HOT ROD FANTASY FOOTBALL BOYS

Week 2 Breakdown

The Rundown Week 2

🏆 **High Scorer of the Week**
Derrick — 138.28 pts
Derrick bounced back from his Week 1 loss with the highest score of Week 2, beating **Dawson** 138.28-127.92.
The big week pushed him to 248.88 points through two games, the highest total in the league. It is also the highest two-week scoring total of **Derrick's** modern-era history, sitting 62.52 points above his previous average through Week 2.

🍀 **Lucky Break**
Ed — 82.86 pts | 1-10 All-Play

The Ed Effect may still be alive.
Ed posted the second-lowest score of Week 2 and would have lost to 10 of the other 11 teams, but **Bryan** happened to score 82.82. The result was a 0.04-point win, the closest game in league history, and somehow moved **Ed** to 2-0.
Through two weeks, **Ed's** opponents have scored just 156.18 total points, the lowest total faced by any team in the league. That is 59.15 points below the league-average points against, with his opponents averaging only 78.09 points per game.
Ed himself sits 19.67 points below the league scoring average, yet he is still undefeated. Whether it is matchup luck, bad timing for everyone else, or just another chapter of the Ed Effect, his opponents keep finding quiet weeks when they see Van Buren Boys on the schedule.

🎲 **Not So Lucky**
Dawson — 127.92 pts | 10-1 All-Play
Dawson went from 1-10 in all-play in Week 1 to 10-1 in Week 2, only to come away 0-2.
His 127.92 points were the second-highest total of the week and pushed him to 221.58 PF through two games, more than both undefeated teams, **Kyle** and **Ed**. He also remains above the league scoring average despite the winless start.
On the other side of the ledger, **Dawson's** opponents have combined for 242.22 points, third-most in the league through two weeks.
If the Week 2 scoring carries over, **Dawson** should have a much better chance to finally turn the production into his first win in Week 3.

🪑 **Bench Blunders**
Three teams were one lineup change away from a win

Castano: Lost by 14.76 points, but left 16.06 points on the bench by starting Drake Maye over Bryce Young. One QB change would have flipped the result.

Hannah: Lost by 9.22 points, while Stefon Diggs outscored Deebo Samuel by 14.2 from the bench. One flex switch would have been enough.

Bryan: Lost by just 0.04 points after getting 1.6 from Pat Bryant. He had multiple bench WR options that would have changed the outcome, including Courtland Sutton at 4.0 and Brian Thomas Jr. at 5.5.

🎯 **Sharp Shooter**
Dawson — 94% Lineup Accuracy
Dawson nearly maxed out his lineup in Week 2. His starters put up 127.92 points, second-most in the league, and he left only 1.5 potential points on the bench. There was almost nothing more to squeeze out of the roster.
The lineup was right. The matchup wasn't.

Around the League

The Ed Effect is still alive

Ed's opponents have scored just 156.18 points through two weeks, the lowest total in the league and 59.15 below the league-average PA. That follows a 2025 season in which Ed faced only 1,255.70 points, also the lowest PA in the league and more than 209 points below average.

Two 0-2 teams, two very different starts

Dawson and Castano share the same record, but not the same profile. Dawson has scored 221.58 points, above league average and more than both undefeated teams. Castano sits at 189.34 PF, nearly 26 points below average. Dawson has also faced the third-most PA in the league.

The middle has never been this crowded

Eight teams enter Week 3 at 1-1, the most in the modern era, and this week could tighten the standings even further.
If Ed and Kyle both lose, 2026 would become the second straight season with no undefeated teams after three weeks, tying 2025 for the shortest undefeated run in modern league history.
At the other end, if Dawson and Castano both win, there would be no winless teams entering Week 4 for the first time since 2021.
If all three results break that way, Week 4 would open with every team holding at least one win and at least one loss, something we haven't seen since 2021.

.

The injury bug is already reshaping the season

Through two weeks, injuries have already started changing the shape of several rosters. Twelve notable offensive starters have either missed more than half a game or are facing multi-week absences, including five quarterbacks and five wide receivers. John has taken one of the biggest hits, with multiple early-round picks missing time, while Derrick and Brett have also had quarterback situations affected.

Week 3: What's at Stake

John (1-1) vs. Wayne (1-1)

Both teams sit on the biggest Week 3 historical fork. A win moves either to 2-1, where 69.2% of teams have made the playoffs; a loss drops them to 1-2, where only 23.5% have recovered. The path is familiar for both: **Wayne** was 2-1 last year and went on to win the championship, while **John** started 2-1 in 2024 and reached the title game.

Bryan (1-1) vs. Derrick (1-1)

This is another matchup where the record hides a big gap in performance. **Derrick** leads the league with 248.88 PF and sits 33.55 above average, while **Bryan** is 28.57 below average at 186.76. Both are 1-1, but Week 3 will send one into the much stronger 2-1 historical bucket and the other down to 1-2.

Dawson (0-2) vs. Josh (1-1)

Dawson enters winless, but his 221.58 PF is above league average and higher than both 2-0 teams. **Josh** can move into the 2-1 group that has made the playoffs 69.2% of the time. **Dawson**, meanwhile, is trying to keep an above-average scoring start from turning into an 0-3 hole. Since 2021, only 3 of 10 teams that started 0-3 recovered to make the playoffs.

Kyle (2-0) vs. Brett (1-1)

The records favor **Kyle**, but the underlying numbers favor **Brett**. Kyle is 2-0 despite sitting below league-average PF, while **Brett** owns the league's best 17-5 all-play record and is 26.75 points above the scoring average. **Kyle** can become the league's first 3-0 team; **Brett** is trying to avoid falling into the much less successful 1-2 historical group.

Ed (2-0) vs. Castano (0-2)

This matchup may tell us more about both teams than their records do. **Ed** is undefeated despite sitting 19.67 points below league-average PF, while Castano is 0-2 with only two teams below him in scoring. Through two weeks, **Castano** would be 2-0 with **Ed's** schedule, while **Ed** would be 0-2 with **Castano's**. Week 3 puts those opposite starts head-to-head.

Lewis (1-1) vs. Hannah (1-1)

Both teams are 1-1, but they have arrived there very differently. **Hannah** sits 16.25 points above the league scoring average, while **Lewis** is 38.89 below it, the lowest PF total in the league. A win puts either team into the 2-1 group that has historically made the playoffs 69.2% of the time; a loss sends them to 1-2, where that rate falls to 23.5%.

Historical playoff rates after Week 3:
3-0: 71.4% | 2-1: 69.2% | 1-2: 23.5% | 0-3: 30.0%

2026 RECORDS

Record vs. Performance

BY THE NUMBERS

116.35 vs. 98.97
Average score for winning teams vs. losing teams through the first two weeks.

17-5
Brett owns the league's best all-play record and ranks 2nd overall in scoring at 242.08 PF, despite sitting just 1-1.

59.15
Ed's opponents have scored 59.15 fewer points than the league-average PA through two weeks.

248.88 / 250.88
Derrick leads the league in PF (248.88) while also facing the most PA (250.88).

3-19
Bryan owns the league's lowest all-play record, and his 186.76 PF is his second-lowest two-week total since 2021. His only lower start came in 2024, the only season in the last five that he missed the playoffs.

TEAM PERFORMANCE THROUGH WEEK 2

HOT ROD FANTASY FOOTBALL BOYS • 2026 SEASON

TWO GAMES IN, RECORDS AND UNDERLYING PERFORMANCE ARE ALREADY TELLING DIFFERENT STORIES.

RANK (BY PF)	TEAM	MANAGER	RECORD	ALL-PLAY	PF	VS AVG (PF)	PA	VS AVG (PA)
1	Uncle D	Derrick Gregory	1-1	15-7	248.88	+33.55	250.88	+35.55

HOT ROD FANTASY FOOTBALL BOYS

WEEK 2 STORYLINES

2026 WEEK 2

Ed keeps winning without scoring

Ed's opponents have scored just 156.18 points through two weeks, 59.15 below the league-average PA. That follows a 2025 season in which Ed faced only 1,255.70 points, more than 209 points below the league average and the lowest PA in the league.

Brett looks better than his record

Brett is only 1-1, but the underlying numbers are among the league's best. He ranks 2nd in total scoring at 242.08 PF and owns the league's best 17-5 all-play record through two weeks.

Not all 0-2 starts are equal

Dawson and **Castano** have the same record, but not the same profile. Dawson is above league average in scoring at 221.58 PF, while **Castano** is 25.99 points below it at 189.34. **Dawson** has also faced the third-most PA in the league through two weeks.

Derrick is producing despite the toughest draw

Derrick leads the league with 248.88 PF, but he has also faced a league-high 250.88 PA. His 1-1 record has come with both the strongest scoring output and the toughest opponent scoring draw so far.

Bryan's slow start has some historical weight

Bryan sits 1-1, but his 3-19 all-play record is the worst in the league. His 186.76 PF is also his second-lowest two-week total since 2021. The only lower start came in 2024, the only season in the last five that he missed the playoffs.

Week 3 could create the first real separation

With eight teams sitting at 1-1, Week 3 is guaranteed to leave at least four teams at 2-1 or better. Since 2021, teams that reached 2-1 or better after Week 3 have made the playoffs 23 of 33 times, a 69.7% rate. Teams sitting 1-2 or worse have made it only 7 of 27 times, or 25.9%.

That does not make Week 3 a must-win, but it does make it the first week where the standings start splitting into historically very different paths. With so much of the league still packed in the middle, this week should create the clearest separation we have seen yet.
