HOT ROD FANTASY FOOTBALL BOYS

Week 3 Breakdown

The Rundown Week 3

🏆 **High Scorer of the Week**
Derrick — 150.18 pts | 11-0 All-Play

Derrick turned in the highest score of the 2026 season, putting up 150.18 points and going a perfect 11-0 in Week 3 all-play.

He is now the only team in the league to score at least 110 points in all three weeks, and his 399.06 PF leads the league through three games. The 150.18-85.34 win over **Bryan** also produced a 64.84-point margin, the largest blowout of the season so far.

Three weeks in, **Derrick** has been the league's most consistent high-end scorer and owns the best season all-play record at 26-7.

🍀 **Lucky Break**
Hannah — 95.62 pts | 4-7 All-Play

Hannah opened the season by leading the entire league with 145.22 points, but the last two weeks have looked very different. She has now scored under 100 in back-to-back games, including 95.62 in Week 3.

This time, the matchup worked in her favor. **Lewis** posted a Week 3-low 75.04 points, allowing **Hannah** to turn a 4-7 all-play performance into a comfortable win and move to 2-1.

It is already **Hannah's** best three-week start of the modern era. She began both 2024 and 2025 at 1-2. A Week 4 win over **Ed** would move her to 3-1, also her best four-week start, surpassing her previous high of 2-2.

🎲 **Not So Lucky**
Kyle — 109.90 pts | 6-5 All-Play | 98.5% Accuracy

Kyle did almost everything right and still picked up his first loss.

His 109.90 points were good enough to beat more than half the league, and his 98.5% lineup accuracy led Week 3. Even the one available improvement would not have saved him: starting Joe Burrow over Matthew Stafford adds 1.68 points, raising Kyle to 111.58, still 0.10 behind Brett's 111.68.

There is at least some consolation in the larger picture. **Kyle** is 18-15 in season all-play, sixth overall, and his 2-1 record ties his best three-week start from 2025. A win in Week 4 would give him his first 3-1 start.

🪑 **Bench Blunders**
Wayne — Two Patriots RBs, one costly decision

Wayne started both Rhamondre Stevenson and TreVeyon Henderson, putting two New England running backs into the same lineup. Stevenson finished with 5.3 points, while Henderson managed just 3.4 in the FLEX.

Meanwhile, Michael Wilson scored 20.4 points on Wayne's bench. Starting Wilson over Henderson would have added exactly 17.0 points, turning a 116.26-99.80 loss to **John** into a 116.80-116.26 win.

One lineup switch was the difference between a 16.46-point loss and a 0.54-point victory.

🎯 **Sharp Shooter**
Lewis — 93.6% Season Lineup Accuracy

Lewis leads the league in season lineup accuracy at 93.6%, despite sitting last in scoring at 251.48 PF.

Week 3 summed it up: 8 of 9 starters underperformed their projections, yet Lewis still made the right calls with what he had. The problem has not been lineup management. If the roster does not start producing, it could be a long season.

Around the League

0-3 has been survivable. 0-4 has not.

Dawson and **Castano** are both 0-3, but they are also two of only three teams since 2021 to start 0-3 and still make the playoffs. **Dawson** recovered in 2021, **Castano** did it on the way to a 2022 co-championship, and **Bryan** in 2022 is the only other team to pull it off.

The next loss has historically changed everything. No team to start 0-4 has made the playoffs, going 0-for-6 in the modern era. Both **Dawson** and **Castano** enter Week 4 with that line directly in front of them.

Ed stands alone, but this 3-0 start looks different

Ed is the league's only 3-0 team and just the 8th team since 2021 to start perfect. Five of the previous seven made the playoffs, including two champions.

But **Ed's** path has been unusual: his 320.34 PF is the lowest of any modern-era 3-0 team, and his 17-16 all-play record is the second-lowest. A Week 4 win would give him his first 4-0 start, a mark only four teams have reached since 2021, with three making the playoffs.

Week 3 created the first real separation

Eight teams entered Week 3 at 1-1. One week later, the standings have spread to one 3-0 team, six at 2-1, three at 1-2 and two at 0-3.

Historically, that split matters as teams sitting 2-1 or better after Week 3 have made the playoffs **23 of 33 times, 69.7%**, compared with just **7 of 27, 25.9%**, for teams at 1-2 or worse.

Week 4 has been another major fork

The difference between the records teams can leave Week 4 with has been substantial over the last five seasons.

3-1 teams have made the playoffs **13 of 16 times, an 81.3% rate**. At 2-2, it drops to exactly **11 of 22, 50%**. Teams falling to 1-3 have recovered only **3 of 12 times**, 25%, while 0-4 teams are **0-for-6.**

So for most of the league, Week 4 is another clean dividing line: 3-1 has historically looked like a playoff start, 2-2 has been a true toss-up, and 1-3 has left teams fighting uphill.

Week 4: What's at Stake

John (2-1) vs. Kyle (2-1)

Both teams are sitting on the same historical fork. A win moves either to 3-1, a start that has produced a playoff team 81.3% of the time since 2021. The loser falls to 2-2, where the rate drops to 50%. **John** enters 4th in season all-play at 22-11, while **Kyle** sits 18-15.

Ed (3-0) vs. Hannah (2-1)

Ed is trying to become just the fifth 4-0 team of the modern era. Three of the previous four made the playoffs. **Hannah** has her own milestone in reach: a win would give her the first 3-1 start of her modern-era history and move her into a group that has made the playoffs more than 80% of the time.

Bryan (1-2) vs. Castano (0-3)

This one carries very different stakes. **Bryan** can get back to 2-2, while **Castano** is trying to avoid the historical danger zone. **Castano** is one of only three teams since 2021 to recover from 0-3 and make the playoffs, but no team has ever recovered from 0-4.

Derrick (2-1) vs. Josh (2-1)

Two of the league's strongest teams underneath the standings meet here. **Derrick** leads the league in both PF (399.06) and all-play at 26-7, while **Josh** sits 3rd in all-play at 23-10. One moves to the historically strong 3-1 group. The other drops back to .500.

Dawson (0-3) vs. Wayne (1-2)

Dawson has escaped 0-3 before, making the playoffs after the same start in 2021. He now faces the line nobody has crossed: 0-4 teams are 0-for-6 making the playoffs. **Wayne**, meanwhile, can get back to 2-2 after a 1-2 start that looks better underneath, with a 20-13 all-play record.

Lewis (1-2) vs. Brett (2-1)

Lewis can pull back to 2-2, but another loss would drop him to 1-3, a start that has produced playoff teams only 25% of the time. **Brett** can move to 3-1 and strengthen a profile that already includes the league's 2nd-best all-play record at 24-9.

Historical playoff rates after Week 4:
4-0: 75% | 3-1: 81.3% | 2-2: 50% | 1-3: 25% | 0-4: 0%

2026 RECORDS

High Score:
150.18 — Derrick, Week 3

Lowest Winning Score:
82.86 — Ed, Week 2

Highest Losing Score :
127.92 — Dawson, Week 2

Closest Match:
0.04 pts — Ed over Bryan, Week 2, 2026

Historical Records

High Score:
211.78 — Lewis, Week 14, 2024

Lowest Winning Score:
57.88 — Juan, Week 1, 2023

Highest Losing Score :
155.54 — Brett, Week 8, 2024

Closest Match:
0.04 pts — Ed over Bryan, Week 2, 2026

Record vs. Performance

BY THE NUMBERS

43.60
Derrick's lead over the league's second-highest scorer after three weeks. He sits at 399.06 PF, with **Josh** next at 355.46.

26-7
Derrick's season all-play record, the best in the league. He would have beaten 78.8% of all possible opponents through three weeks.

17-16
Ed's all-play record despite being the league's only 3-0 team. His actual record is perfect; his week-to-week scoring profile is almost exactly .500.

0-6
Modern-era playoff record for teams that started 0-4. **Dawson** and **Castano** both enter Week 4 trying to avoid joining that group..

93.6%
Lewis leads the league in season lineup accuracy despite ranking last in PF at 251.48. He's making the right lineup decisions; the roster simply hasn't delivered.

PLAYOFF PACE CHECK

2026 through Week 3 vs. the 2025 playoff field and the 2022–2025 top-six profile

2026 TOP-SIX PF AVG	2025 PLAYOFF-FIELD PACE	HISTORICAL TOP-SIX BENCHMARK (2022–2025)
351.85 PF	335.04 PF	326.91 PF

2026 CONTENDER SNAPSHOT

Teams 2-1 or better after Week 3

#	TEAM	REC	PF
1	Ed	3-0	320.34
2	Derrick	2-1	399.06
3	Josh	2-1	355.46
4	Brett	2-1	353.76
5	John	2-1	335.96
6	Hannah	2-1	327.20
7	Kyle	2-1	318.48

- **7 teams** are already **2-1** or better.
- **5 of those 7** are above the 326.91 PF historical benchmark: Derrick, Josh, Brett, John, Hannah.

2025 PLAYOFF FIELD AFTER WEEK 3

FINISH	TEAM	REC	PF
1	Wayne	2-1	357.70
2	Ed	2-1	343.00
3	Bryan	2-1	331.30
4	Derrick	2-1	332.10
5	Kyle	2-1	355.28
6	Castano	2-1	290.86
BUBBLE	Hannah	1-2	294.06

All 6 eventual playoff teams were **2-1** after Week 3.

2025 PLAYOFF TEAMS: WHERE THEY STOOD AFTER WEEK 3 AND WEEK 7

SEED	TEAM	WEEK 3	WEEK 7	FINAL REC
1	brybrybaggins	2-1	6-1	11-3
2	Uncle D	2-1	5-2	11-3
3	Phins 1-16	2-1	5-2	8-6
4	Van Buren Boys	2-1	6-1	10-4
5	Disrespect Ya Chick	2-1	3-4	8-6
6	For The Shoe	2-1	4-3	7-7

- **All 6 of last year's playoff teams were already 2-1 after Week 3.**
- **By Week 7, four of the six were already 5-2 or better.**
- **Week 3 doesn't lock the field, but it usually points you in the right direction.**

HOT ROD FANTASY FOOTBALL BOYS

WEEK 3 STORYLINES

2026 WEEK 3

Derrick has become the early pace-setter

Derrick's 150.18 was the highest score of the 2026 season and pushed him to a league-best 399.06 PF, already 43.60 points clear of second place.

He also owns the best season all-play record at 26-7 and has now posted the league's high score in consecutive weeks. Three weeks in, nobody has combined consistency and ceiling better.

Wayne looks better than 1-2

Wayne's record slipped to 1-2, but the underlying numbers still look like those of a contender. He ranks 4th in scoring at 339.66 PF and 5th in all-play at 20-13.

Week 3 was particularly painful because one lineup switch would have turned the loss into a win. The standings say 1-2; the performance says Wayne has been considerably better.

Not all 0-3 starts are created equal

Dawson and **Castano** share the same 0-3 record, but their seasons look very different underneath. **Dawson** has scored 308.34 points, nearly 40 more than **Castano's** 269.10, while also facing a league-high 374.22 PA.

Castano has struggled more from his own scoring, while **Dawson's** record has been compounded by the league's toughest opponent scoring draw.

Lewis is making the right calls, but the roster isn't delivering

Lewis leads the league with a 93.6% season lineup accuracy, yet Tractorcito ranks last in scoring at 251.48 PF and sits just 6-27 in all-play.

Week 3 captured the problem: eight of nine starters underperformed their projections. Lewis has largely been starting the right players. The bigger question is whether those players can start producing.

Brett keeps building a strong profile

Brett is only 2-1, but his underlying start has been one of the league's best. He ranks 3rd in scoring at 353.76 PF and owns the second-best all-play record at 24-9.

The Week 3 win over **Kyle** came by just 1.78 points, but the larger sample has **Brett** looking much stronger than a team simply surviving close games.

One last week at full strength

Week 4 is the final week before NFL bye weeks begin, which makes this the last clean shot for managers to roll out something close to a full-strength roster.

Once byes start, depth, waiver decisions, and matchup management become a much bigger part of the season. That makes getting a win now especially valuable, before roster construction starts being tested in a different way.

For teams already sitting 1-2 or 0-3, there is even less room to give away a healthy-roster week.
