HOT ROD FANTASY FOOTBALL BOYS

Week 5 Breakdown

The Rundown Week 5

🏆 High Scorer of the Week
Derrick — 146.86 pts | 11-0 All-Play

Derrick didn't need one player to carry him. All nine starters reached double figures, and none scored more than Davante Adams' 19.60. That depth produced the week's highest total and a 70.04-point win over **Wayne**, the largest margin of the season. Now 3-2, **Derrick** leads the league in both scoring and all-play, with a record-setting 657.84 points through five weeks.

🍀 Lucky Break
Hannah — 106.60 pts | 6-5 All-Play

Hannah had the lowest score among this week's winners, surviving **Castano** by just 1.90. Sixth-round pick Jaylen Warren and tenth-round pick Isaiah Likely supplied season highs totaling 61.20 points, carrying an otherwise quiet lineup. She's tied for the league's best record at 4-1 despite a losing 27-28 all-play mark. Those narrow escapes count, but she may need more consistent production before the schedule stops cooperating.

🎲 Not So Lucky
Castano — 104.70 pts | 5-6 All-Play

Nobody lost with a winning all-play record this week, but **Castano** gets the nod as the highest-scoring loser in the closest matchup. His season-best 104.70 left him just 1.90 short against **Hannah**, whose Warren–Likely combination erased his best chance yet to get on the board. Five weeks in, even his strongest performance has ended in a loss.

🪑 Bench Blunders
Josh — Two Moves from a Win

No single swap would have changed a Week 5 result, but **Josh** had a two-move escape. Starting Samaje Perine over Tony Pollard and Terry McLaurin over Jake Ferguson, with Tucker Kraft sliding to TE, adds 16.40 points. His 13.04-point loss to **Bryan** becomes a 3.36-point win, keeping his winning streak alive and putting him at 4-1.

🎯 Sharp Shooter
Bryan & Castano — 100%
Week 5 Lineup Accuracy

Both maximized their rosters, though only **Bryan** collected a win. Bye weeks make perfection easier with fewer alternatives, while **Lewis** still leads season-long accuracy at 93%, ahead of **Josh's** 91.7%. At the other end, **Hannah** survived with a league-worst 80% this week. That reflected underperforming stars more than obvious start/sit mistakes, but she still escaped with a victory that Castano's perfect lineup couldn't deliver.

League Historical playoff rates after Week 6:
5-1: 100% (7/7) | 4-2: 76.9% | 3-3: 44.4%
2-4: 20.0% | 1-5: 14.3% | 0-6: 0%

Nationwide 2025 playoff rates according to Sleeper:
5-1: 92.5–92.9% | 4-2: 76.7–79.1% | 3-3: 52.1–56.9%
2-4: 27.6–30.2% | 1-5: 10.2–12.2% | 0-6: 2.9%

Around the League

Derrick Is Chasing the Record Book, and Three Teams in the Standings

Nobody in the six-season archive has scored more through five weeks than **Derrick's** 657.84 points. He's averaging 131.57 per game, nearly 23 above the league average, and scoring at a pace that would break **Wayne's** regular-season record by almost 143 points. Yet at 3-2, he's still looking up at **John**, **Ed** and **Hannah**. His latest performance offered the defending champion a particularly uncomfortable view of that pursuit: a 70.04-point loss, the largest margin of the season.

Three Teams at 4-1, Three Different Stories

John, **Ed** and **Hannah** have reached the same neighborhood by different routes. **John** owns the league's second-best all-play record at 39-16 and has won three straight. **Ed** has faced the fewest points in the league, but his 134.64 this week would have beaten everyone except **Derrick**. **Hannah** survived **Castano** by 1.90 and sits 4-1 despite a 27-28 all-play record. All three have earned room to breathe: 13 of the 14 teams that started exactly 4-1 from 2021–2025 eventually made the playoffs.

Bryan Gives the Numbers Something to Work With

For a month, **Bryan's** record was easier to admire than explain. Week 5 finally supplied a win that needed no defense. His 116.68 ranked fourth in the league, ended **Josh's** three-game winning streak and moved him to 3-2. The season-long contrast remains striking: **Bryan** and **Derrick** share a record despite a 178.10-point scoring gap. But this time, **Bryan** didn't need the schedule to find him someone he could beat. He outscored eight other teams.

Dawson Gets Out. Castano Gets Close.

Dawson ended his four-game losing streak with 131.90 points and a comfortable win over **Kyle**. **Castano** came within 1.90 of joining him, instead falling to 0-5 against **Hannah**. Nine games remain, but the room for another near-miss is shrinking. Reaching eight wins would require **Castano** to finish 8-1; **Dawson** would need to go 7-2. Neither is eliminated, though either playoff run would now become the first recovery from an 0-4 start in the six-season archive.

Week 6: What's at Stake

Ed (4-1) vs. John (4-1): First to Five

John has won three straight; **Ed** just posted his season high. The winner reaches 5-1, a start all seven historical teams converted into playoff appearances. **John** holds the stronger all-play record at 39-16, but **Ed** outscored him by 21.40 last week. Whoever wins takes an early advantage in the race for a playoff bye.

Bryan (3-2) vs. Hannah (4-1): Something Has to Give

Both have losing all-play records and the lowest scoring totals among winning teams. Only **Ed** has faced fewer points, yet **Hannah's** playoff odds sit at 68% to **Bryan's** 32%. **Hannah** can extend her career-best start to 5-1 and push a challenger further back. **Bryan** can pull both to 4-2, though he needs a margin greater than 58.98 points to erase her scoring advantage and move ahead on the points tiebreaker. Winning closes the gap. Taking her spot requires a rout.

Josh (3-2) vs. Wayne (2-3): Familiar Territory, Different Stakes

Only two of ten teams starting 2-4 have recovered to make the playoffs, though **Wayne** was one of them in 2021. He'd rather avoid needing a repeat. **Josh** can reach 4-2, ahead of **Kyle's** 3-3 and **Hannah's** 1-5 marks through six weeks of their debut seasons. A **Wayne** win instead brings both teams to .500.

Castano (0-5) vs. Brett (2-3): A Good Time for a Season High

Brett ranks fourth in scoring but faces opponents averaging 17.46 points above the league norm. Some hope for **Castano**: **Lewis** and **Ed** both posted season highs against **Brett** the past two weeks. He'll need that kind of turnaround. A third straight playoff appearance remains possible, but his league-low scoring leaves little protection in a points tiebreaker.

Dawson (1-4) vs. Lewis (2-3): Which Lewis Shows Up?

Lewis averages 125.09 points in wins and just 80.68 in losses. **Dawson** needs the quieter version to turn his first victory into a recovery. His scoring average sits only 5.84 below the league norm, but his playoff odds are down to 12%, just behind **Lewis** at 16%. A **Dawson** win leaves both 2-4; **Lewis** can reach .500 while sending **Dawson** to 1-5. Neither has much room for another missed opportunity.

Derrick (3-2) vs. Kyle (2-3): No Relief in Sight

Kyle's last three opponents finished second, second and third in weekly scoring. Now comes the league's scoring leader, averaging 131.57 points. **Derrick** can reach 4-2 and keep pressure on the leaders, while another **Kyle** loss would be his fourth straight after opening 2-0. An upset would stop that slide and leave both teams at 3-3, despite their very different paths.

2026 RECORDS

High Score:
150.18 — Derrick, Week 3

Lowest Winning Score:
82.86 — Ed, Week 2

Highest Losing Score :
Kyle, 132.42 (W4)

Closest Match:
0.04 pts — Ed over Bryan, Week 2, 2026

High Score:
211.78 — Lewis, Week 14, 2024

Lowest Winning Score:
57.88 — Juan, Week 1, 2023

Highest Losing Score :
155.54 — Brett, Week 8, 2024

Closest Match:
0.04 pts — Ed over Bryan, Week 2, 2026

Draft Capital vs. Production

BY THE NUMBERS

188.32 POINTS

Brett's opponents have scored 188.32 more points than **Ed's** opponents through five weeks. That's a schedule difference of 37.66 points per game. **Brett** sits 2-3 despite outscoring **Ed** by 28.36; **Ed** is 4-1.

1st, 1st...4th

Derrick leads in scoring and all-play but sits fourth by record and points. His 43-12 all-play mark means he has outscored 78.2% of possible opponents, yet won just three of five actual matchups.

SAME RECORD, DIFFERENT SEASONS

Bryan and **Josh** are both 3-2, but **Josh** has scored 108.74 more points and owns 20 more all-play wins. Five weeks have produced identical records from very different levels of production.

4-1 WITH A LOSING RECORD

Hannah shares the league's best actual record despite going 27-28 against the full field. She has faced the second-fewest points, and last week's 1.90-point escape shows how little separates another win from a different story.

0.52 POINTS, TWO WINS

Hannah has scored just half a point more than **Kyle** all season, yet leads him by two victories. **Kyle** has faced 88.54 more points. Their production is nearly identical; their paths through the schedule have been anything but.

4 FAVORITES. 2 OPENINGS.

Four teams carry playoff odds of 85% or better. **Hannah** (68%) and **Brett** (54%) lead the race for the remaining spots, but Week 6 puts the bubble head-to-head: **Bryan** (32%) gets a direct shot at **Hannah**, while **Lewis** (16%) and **Dawson** (12%) fight to keep the race within reach.

THE BREAKDOWN

HOT ROD FANTASY FOOTBALL BOYS

WEEK 5 STORYLINES

2026 WEEK 5

No Playoff Spots for Bad Luck

Replace actual records with all-play and **Brett** and **Kyle** move into the top six, pushing **Hannah** and **Bryan** out. It's a compelling argument with no value in the standings. Being better than most of the league only helps when you're better than the person across from you.

The Numbers Mostly Agree

Points scored and all-play place ten of the twelve managers in exactly the same position. Only **Hannah** and **Kyle** trade places. That agreement suggests the performance picture is fairly clear through five weeks. It's the actual standings, shaped by who faced whom, that tell a noticeably different story.

John Has Faced Some Resistance

Ed, **Hannah** and **John** share a 4-1 record, but **John** is the only one who has faced more than the league-average opponent total. His second-place ranking in both scoring and all-play gives his start support beyond the win column. This week's meeting with **Ed** puts two different routes to 4-1 on the same field.

Dawson's First Win Wasn't His First Good Week

Dawson scored 127.92 in Week 2 and lost. He scored 131.90 in Week 5 and won comfortably. Those performances were separated by fewer than four points, yet produced very different impressions of his team. His first victory matters, but the ability to put up a competitive score was already there.

The Bottom Half Will Get Some Relief

Brett–Castano and **Dawson–Lewis** guarantee two wins for teams currently below .500, while **Ed–John** and **Bryan–Hannah** guarantee two losses among the leaders. That won't erase the divide, but it creates room for movement. **Wayne** and **Kyle** can tighten things further by beating **Josh** and **Derrick**.

You Can Fix Your Lineup. You Can't Fix Your Schedule.

Brett's opponents average 126.13 points per week; **Ed's** average 88.47. **Brett** scores more, yet trails **Ed** by two wins. **Derrick** has the highest five-week scoring total in the six-year archive and sits 3-2, while **Hannah** averages just 0.10 more than **Kyle** and owns two extra victories. You choose your starters. The schedule decides how much they need to score.
